MODERN CARBON RIFLE

MODERN
CARBON
RIFLE

FEATURING
fft FLASH
FORGED
TECHNOLOGY™

The Modern Carbon Rifle, or MCR, is a masterpiece of innovation. Starting with a miraculously lightweight yet incredibly durable FFT™ carbon fiber stock, the MCR features an adjustable push-button FFT™ cheek riser, full-length M-LOK™ on the forearm, front and rear QD attachment points, adjustable length of pull via spacers, and an integrated forward Picatinny rail section. The Remington 700 style action is topped with an optic-ready 20-MOA Picatinny rail and features a skeletonized bolt handle with an FFT™ carbon fiber bolt knob. Married to the action is a free-floating, hand lapped, button rifled Christensen Arms aerograde carbon fiber barrel with a Match chamber and suppressor-ready threaded muzzle equipped with a premium side-baffle brake. Rounding out this powerhouse of a rifle is an ergonomically designed hybrid grip and a crisp, adjustable TriggerTech® trigger. The MCR is the Future of Carbon Fiber™
